TMY CORPORATION
since 1947

COMPANY

TMY Corporation is a trading company specialized in the automotive sector, and we are a member of JAPA(Japan Automotive Products Association).
TMY Group contributes to all scenes related to people and cars in Japan and overseas and the creation of a new future for motorized society.

TMY DIVISIONS

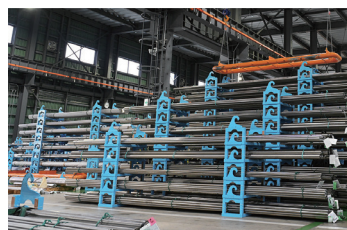

Auto Spare Parts Division

We have 24 branches in Japan and distribute auto spare parts to the domestic markets.
Each branch has various products and enough stock to meet the customers' demand.

Auto Accessories Division

We have developed the original sports brand "RG" and the original brand "SR" of safety products, and participate in various motor events.

Steel Division

We have 5 branches in Japan and a joint venture named "KDI" in Indonesia.
We supply various kinds of steel to several industries for the Japan domestic market and overseas.

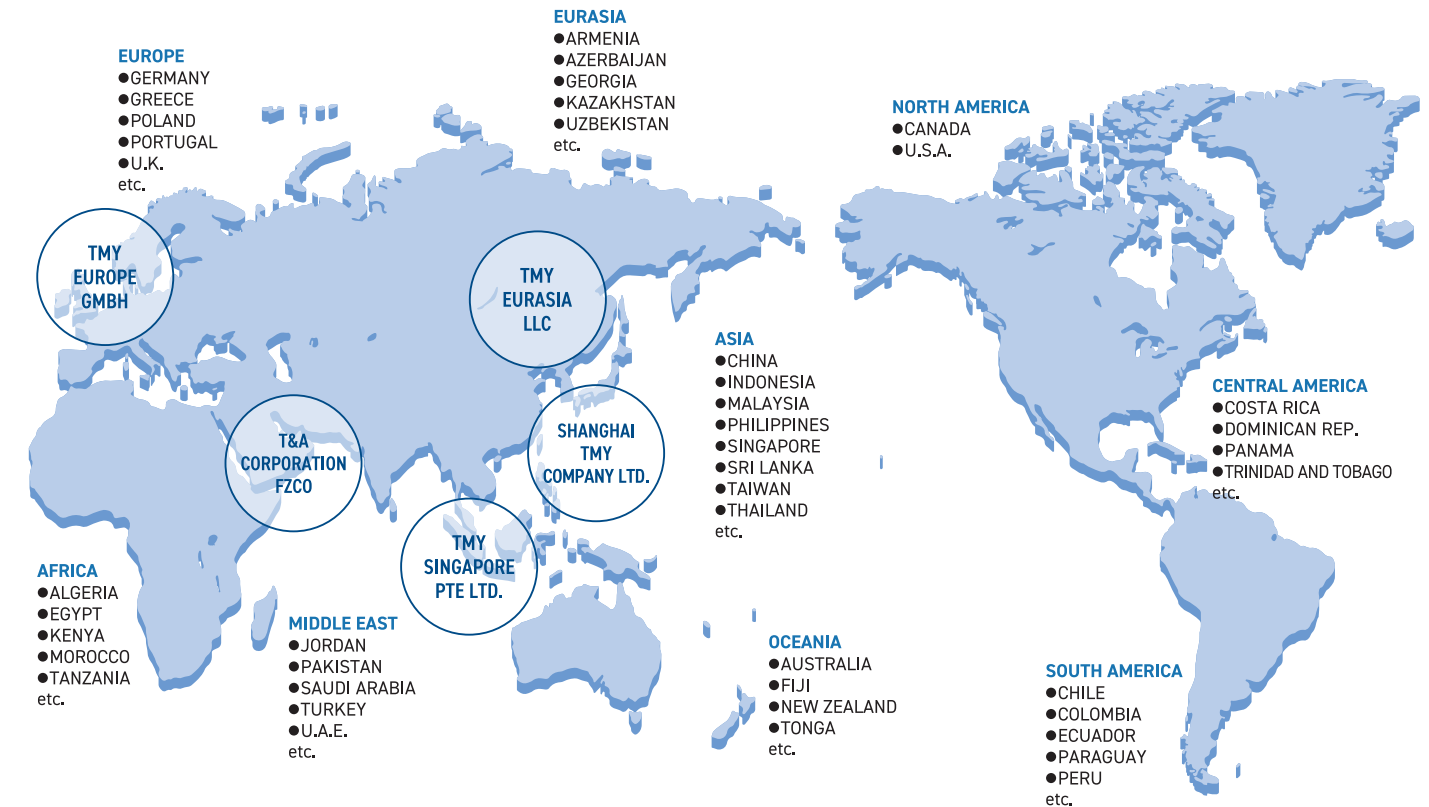

Industrial Equipment (Tatsumi Shoji Co., Ltd.)

Tatsumi Shoji Co., Ltd. provides various types of machine tools and overhaul components to major manufacturers in Japan.
Toyota branch is certified ISO14001.

OVERSEAS DIVISION

With our global network, we provide aftermarket solutions for all mobility by collaborating with Japanese and international suppliers

HIGH PERFORMANCE PRODUCT

**SHOCK ABSORBER, HUB UNIT,
WHEEL BEARING**

A company that stays in close proximity to motorized society. And even closer to the customers.

TMY Corporation was established in 1947 as a specialized company selling spring steels and automotive leaf springs. Now, TMY Corporation has become a trading company specialized in the automotive sector that has established one of the most extensive branch networks of the industry in Japan. Our company adapts quickly and flexibly to the ever-changing market to provide high-quality products and solutions to its customers.

In the future, we will continue to respond to the needs of our customers and create new values thanks to our extensive experience and know-how developed during the long history of our company.

From local to global, and toward the future

The environment surrounding motorized society is changing with time due to factors such as globalization and environmental issues. The roles we have to assume are also becoming more and more important with these changes. Such roles include, for example, the development of immature markets in foreign countries by supporting the expansion of our activities, the handling of eco-friendly products, and the creation of new markets through product development. In the future, we will continue to collect market and cutting-edge information from manufacturers, local subsidiaries, and other actors to keep carrying out our activities with a focus on the future of the automotive industry and the manufacturing sector.
